

JOB SEASON GUIDE (JAN–FEB–MAR)

DEVOPS ENGINEER – ROLE-SPECIFIC EDITION

1. ATS-FRIENDLY DEVOPS RESUME TEMPLATES

Important rules:

- Single column, no tables, no icons
 - Plain text, role-specific keywords
 - Save as PDF
 - One resume per job role
-

A. DEVOPS RESUME TEMPLATE – FRESHER

Full Name

City, Country | Phone | Professional Email

LinkedIn | GitHub

SUMMARY

Entry-level DevOps Engineer with hands-on experience in CI/CD pipelines, Docker, cloud fundamentals, and infrastructure automation through real-world projects. Strong understanding of DevOps principles and eager to contribute to scalable systems.

TECHNICAL SKILLS

- OS: Linux (Ubuntu, Amazon Linux)
- Version Control: Git, GitHub
- CI/CD: Jenkins, GitHub Actions
- Containers: Docker, Docker Compose
- Cloud: AWS (EC2, IAM, S3, VPC – basics)
- IaC: Terraform (basic)
- Monitoring: CloudWatch (basic)
- Scripting: Bash (basic)

PROJECTS

CI/CD Pipeline for Web Application

- Built end-to-end CI/CD pipeline using GitHub and Jenkins
- Automated build, test, and Docker image creation
- Deployed application on AWS EC2 using Docker
- Improved deployment consistency and reduced manual effort

Infrastructure Automation Project

- Provisioned AWS EC2 and Security Groups using Terraform
- Used IAM roles for secure access
- Version-controlled infrastructure code using Git

EDUCATION

Degree | University | Year

CERTIFICATIONS (Optional)

- AWS Cloud Practitioner
- Linux Fundamentals

B. DEVOPS RESUME TEMPLATE – EXPERIENCED

Full Name

City, Country | Phone | Email

LinkedIn | GitHub

PROFESSIONAL SUMMARY

DevOps Engineer with years of experience in designing, automating, and maintaining CI/CD pipelines, containerized applications, and cloud infrastructure. Strong expertise in AWS, Docker, Kubernetes, and automation best practices.

CORE SKILLS

- CI/CD: Jenkins, GitHub Actions, GitLab CI
- Containers & Orchestration: Docker, Kubernetes
- Cloud: AWS (EC2, IAM, VPC, S3, RDS)
- IaC: Terraform, CloudFormation
- Monitoring: Prometheus, Grafana, CloudWatch
- Scripting: Bash, Python
- SCM: Git, GitHub, Bitbucket
- OS: Linux

PROFESSIONAL EXPERIENCE

Company Name – DevOps Engineer | Duration

- Designed and maintained CI/CD pipelines for multiple applications
- Automated infrastructure provisioning using Terraform
- Containerized applications using Docker and deployed on Kubernetes
- Improved deployment frequency and reduced failures through automation
- Implemented monitoring and alerting for production systems

PROJECTS (Optional)

- Kubernetes cluster setup with rolling deployments
- Blue-green or canary deployment implementation

EDUCATION

Degree | University | Year

CERTIFICATIONS

- AWS Solutions Architect Associate
- Certified Kubernetes Administrator (CKA)

2. COLD DM & EMAIL TEMPLATES – DEVOPS REFERRALS

A. COLD DM – DEVOPS FRESHER

Hi ,
I hope you are doing well. I noticed that you are working as a DevOps Engineer at . I am a fresher actively looking for DevOps opportunities and have hands-on experience with Docker, Jenkins, Git, and AWS through projects.

I would really appreciate any guidance or a referral if there is a suitable opening.
Thank you for your time.

Regards,

LinkedIn:

B. COLD DM – EXPERIENCED DEVOPS

Hi ,
I am currently working as a DevOps Engineer with years of experience in CI/CD, AWS, Docker, and Kubernetes. I came across an opening at and noticed you are part of the DevOps team.

I would appreciate a referral if my profile matches the requirement.
Thanks in advance.

Regards,

C. COLD EMAIL – DEVOPS

Subject: Referral Request – DevOps Engineer Role

Hello ,

I hope you are doing well. I am applying for a DevOps Engineer position at . I have experience in building CI/CD pipelines, containerizing applications, and managing AWS infrastructure.

If you find my profile suitable, I would be grateful for a referral.

Thank you for your support.

Best regards,

Phone | LinkedIn | GitHub

3. LEARN IN PUBLIC – DEVOPS VISIBILITY STRATEGY

A. LINKEDIN (MOST IMPORTANT)

What to Post

- CI/CD pipeline explanations
- Docker and Kubernetes learning posts
- AWS architecture breakdowns
- DevOps interview prep notes
- Project demos with diagrams

Frequency

- 3 posts per week

Profile Optimization

- Headline: DevOps Engineer | AWS | Docker | Kubernetes | CI/CD
 - About section: Tools you use + problems you can solve
 - Featured section: GitHub repos, blogs, pipeline screenshots
-

B. TWITTER (X) – DEVOPS COMMUNITY

What to Share

- Daily DevOps learnings
- Short threads on tools (Docker, Jenkins, Terraform)
- Job openings with insights
- Retweet and engage with DevOps engineers

Frequency

- 1–2 tweets daily
-

C. GITHUB – YOUR STRONGEST PROOF

Mandatory Repositories

- CI/CD Pipeline Project
- Dockerized Application
- Terraform AWS Infrastructure
- Kubernetes Deployment Manifest

Best Practices

- Clean README with architecture diagram
 - Step-by-step setup instructions
 - Meaningful commits
 - Realistic project structure
-

4. DEVOPS INTERVIEW TIPS (JOB SEASON READY)

A. CORE TOPICS TO MASTER

- Linux commands and troubleshooting
 - Git branching strategies
 - CI/CD pipeline design (end-to-end)
 - Docker image lifecycle
 - Kubernetes architecture and components
 - AWS IAM, EC2, VPC basics
 - Infrastructure as Code concepts
 - Monitoring and alerting fundamentals
-

B. HOW TO ANSWER DEVOPS QUESTIONS

- Always relate answers to real projects
 - Explain architecture before tools
 - Use: problem → solution → result
 - Mention failures and learnings
-

C. COMMON DEVOPS INTERVIEW MISTAKES

- Tool memorization without understanding
 - No GitHub proof
 - Overloading resume with unused tools
 - Unable to explain CI/CD flow clearly
-

D. 90-DAY JOB SEASON STRATEGY (DEVOPS)

- Daily 10 targeted applications
- Minimum 2 referral DMs per day
- Weekly 1 DevOps project improvement
- 3 LinkedIn posts per week
- Daily interview prep (1–2 hours)

FINAL NOTE

DevOps hiring is **skill + visibility driven**.

Strong projects, clean GitHub, consistent LinkedIn presence, and referrals will outperform mass applications.
